## LED A Type Frosted Bulb

An LED A Type lamp is ideal for downlights, spot lights, pendants, sconces, desk lamps and decorative chandeliers. It consumes only 11 watts and replaces a 60-watt incandescent bulb. The result is more than 80 percent savings in energy. The bulb has a life of 25,000 hours at L70 standards. Lumen maintenance is enhanced by the integrated thermal management system.

### FEATURES:

- Lumens: 800
- 11 watts
- 3000K and 5000K CCT
- 25,000 hour life (L70 standards)
- Proprietary housing for thermo heat protection
- CRI: 80
- Five year limited warranty
- Fully dimmable
- Saves more than 80 percent on energy and operating costs

### CONSTRUCTION:

**LEDs:** All LEDs are matched for color and CRI. The stated 25,000 hour life is based on functional light quality. After 70 percent lumen depreciation, MaxLite considers the functional life of the lamp to be ended.

**Housing:** The body of each lamp is solid aluminum. The aluminum acts as a heat-sink and provides thermal-heat conductivity. This keeps the LED junction temperature well below the manufacturer's specification. The lamps stay cool and the lumens are maintained for longer life.

**Base:** The A Type bulb has a standard E26 base.

### SPECIAL NOTES:

- Suitable for dry locations only
- Not for use in enclosed luminaires

#### Lamp Ordering Information:

| Watts | Order Number | Model Number | Incandescent Equivalent | Delivered Lumens | Beam | Lamp Life (Hrs.) | Dimensions | CCT  |
|-------|--------------|--------------|-------------------------|------------------|------|------------------|------------|------|
| 11    | 71621        | SKB11DLED30* | 60                      | 800              | 160° | 25,000           | 2.4"X4.3"  | 3000 |
| 11    | 72069        | SKB11DLED50  | 60                      | 800              | 160° | 25,000           | 2.4"X4.3"  | 5000 |

Lighting layouts and spacing criteria available upon request
