

LED 4W DECORATIVE CANDLE

An LED dimmable decorative candle for multi-socket ornamental fixtures and decorative chandeliers, the ENERGY STAR®-qualified four-watt LED Decorative Candle in a flame-tip envelope replaces up to a 25-watt incandescent bulb. This results in up to 80 percent savings in energy throughout the L70 25,000 hour life.

FEATURES:

- 4 watts
- CRI: >80
- 25,000 hour life (L70)
- Candelabra base (E12)
- Aluminum housing for thermal heat protection
- Five year limited warranty
- Power factor: .6
- Dimmable down to 10 percent
- Suitable for damp locations
- Not for use in enclosed luminaires

CONSTRUCTION:

LEDs: All LEDs are matched for color and CRI. The stated 25,000 hour life is based on functional light quality. After 30 percent lumen depreciation, MaxLite considers the functionality of the lamp to be ended (end of life), even though the lamp is still at 70 percent of initial lumens.

Housing: The body of each lamp is solid aluminum, which acts as a heat-sink to provide heat conductivity. This keeps the LED junction temperature well below the manufacturer's specification. The lamps stay cool and the lumens are maintained for longer life.
