

SKMR1607LED

LED MR16 5.3 PIN BASE LAMP

Designed to provide years of high-quality light at a fraction of the energy required by comparable halogen lamps, MaxLite's seven-watt LED MR16 lamp is a 50-watt halogen replacement. This LED lamp features Chip On Board (COB) LED for uniform lighting and a single crisp shadow. The non-dimmable lamp is available with a GU5.3 base with a correlated color temperature (CCT) of 2700K and a color rendering index (CRI) of 82 for general lighting applications. For retail displays and architectural applications requiring punch and color, a high 95 CRI model is also available; these models are designed to meet the California Quality LED Lamp Specification.
